

# Spray System Refurbishment Programs

with

## Up-to-Date Design Features and “AS NEW” 2-Year Warranty

### Objectives:

- 10, 20, 30-year-old headers restored to “as-new” condition
- Additional “as-new” 2-year warranty on all repairs
- Upgrade valve assemblies to the latest design features
- System refurb scheduled around planned outages

### Processing:

- Headers inspected and tested to ensure structural integrity
- Overhaul Valves to like new condition
- Upgrade with new harnesses
- All new seals and fasteners
- Detailed inspection and full system function tests prior to returning to customer

Before

After

When  
Quality  
Matters

There are thousands of United States Controls valves working around the world every day after decades of service. Good maintenance can keep them operating as new – WE GUARANTEE IT!

**US Controls**

## Ensure your valves continue to operate at their peak performance

- Same components and assembly procedures as newly built valves
- All work performed by the same machinists and technicians that build new USC spray systems
- Electronics tested for longevity and can be replaced, including coils in most instances
- Most valves can be refurbished to “as new” for a fraction of the cost of a new valve
- All USC refurbished valves receive a new 2-year warranty

## Procedures for returning headers for Refurbishment

- Notification of header assemblies being returned. Call or email Lisa Quinn at contact below. RMA No. not required prior to return.
- Send respective headers to Poland address listed below.  
Attention: Service Department.
- Full evaluation performed after receipt of header(s).
- Detailed quote with scope of repair provided after evaluation.
- Estimated delivery for standard refurb is 12 to 16 weeks from receipt of official purchase order. Condition of header assemblies will determine final delivery schedule as needed.
